

Press Release

CardioComm Solutions, Inc. Announces Changes to Board of Directors

Victoria, B.C., December 9, 2008 – CardioComm Solutions, Inc. (TSX-V: EKG) (“CardioComm” or the “Company”) is pleased to announce that Michael Paquin and Yury Levin have been appointed to the board of directors, effective immediately. Michael Paquin is well recognized as a leading healthcare strategist. His insight and innovation to device connectivity into the EMR have been acknowledged by Microsoft, Frost & Sullivan, TEPR and TETHIC. Previously as the President of Midmark Diagnostic Group (Brentwood), Mr. Paquin was the first to develop an innovative strategy for integrating medical devices into over 70 EMRs. With 30+ years experience in working with physicians, he brings a unique perspective addressing the needs of the back office as they relate to the paperless office. He was the past Chair MSHUG 2005-2006 (Microsoft Healthcare Users Group) and as V.P. of one of the nation’s largest healthcare information organizations, Mr. Paquin utilizes this unique insight to build well thought out strategies for Healthcare. He was also appointed as a Health Information and Management Systems Society (HIMSS) Fellow in 2006, and was recently accepted as a member of the HIMSS Ambulatory Task Force and co-Chair of the Cardiovascular Group of CCHIT. Mr. Levin, who is a Chartered Accountant by training, has a background of experience in sales and marketing of pharmaceutical products in Europe.

The Company also announced that Mr. Jay Hayden, Mr. Ian Klassen and Mr. John McEwen have resigned from the board. The Company thanks the departing board members for their service and welcomes their continued support to the Company while new board membership is secured.

These changes to the board reflect the Company’s continued commitment to ensure its competitive alignment in the changing medical software market. The board of directors’ future composition will bring linkages from physician specialists, medical software and medical device sales and marketing as well as operations management.

About CardioComm Solutions, Inc.

CardioComm’s patented and proprietary technology is used in products for the recording, viewing, analyzing and storing of electrocardiograms (EKGs), for diagnosis and management of cardiac patients. The Company’s products are sold worldwide through a combination of its external distribution network and its North American based sales team. CardioComm has achieved its technical goals of improved access and communication through the development of a real-time EKG viewer. CardioComm is the first company to provide a real-time means of viewing EKGs over a network (LAN, WAN or Internet). This tool enables EKGs to be viewed and controlled live, by physicians, over a global virtual healthcare network. This technology is marketed as Global EKG Management System (GEMSTM) and GlobalCardio™. CardioComm’s software products have been cleared for sale in the United States by the U.S. Food and Drug Administration. The Company has earned the latest ISO 13485 certification.

On behalf of the Board of Directors of CardioComm Solutions, Inc.

“Anatoly Langer”

Anatoly Langer, MD. Chairman of the Board
