

Canada-Israel Industrial Research & Development Foundation / CardioComm Solutions

CardioComm Solutions, Inc. provides technically and clinically innovative software solutions for information management systems in cardiovascular medicine and telemedicine. CardioComm's patented systems enable medical professionals, patients, and other healthcare professionals, clinics, hospitals and call centres to access and manage patient information in a secure and reliable environment. The Company's software enables electrocardiography (ECG) data to be transmitted, received and managed anywhere in the world using standard computers, wireless devices, enterprise networks, telephones or the Internet.
