# **C4 Coordinating Centre for Cardiac Event Loop Monitoring**

Start offering your patients Event Loop Monitoring services today with CardioComm's new state-of-the-art ECG Coordinating Centre.

As one of the leading providers of ECG management services in North America, CardioComm has made it clinically reliable (and now affordable) for you to offer patients Event Loop Recording services in your office.

#### Here's how it works:

### Step 1

Purchase the event loop recording (ELR) device from CardioComm and hook-up patients in your office

Physicians bill a technical fee of \$233.65 (G692) for each patient

Patient returns ELR device to you for use on the next patient.

## Step 2

Patients record and transmit cardiac events via phone-line using our easy-to-use AutoAttendant phone system. The AutoAttendant system offers patients easy-to-understand step-by-step instructions and is available to patients 24 hours a day, 365 days a year.

Once transmitted, patient recordings are instantly available to physicians through our comprehensive web-based Global ECG Management System (GEMS)

You can interpret the ECGs and bill an additional professional fee of \$122.25 (G690) per patient or you can have a Cardiologist interpret/over-read the ECGs for you

- AutoAttendant phone system available to patients 24 hours a day, 365 days a year
- Physicians have full access to patient data and detailed reports at all times
- Full professional support and training available to all participants
- Easy-to-follow tutorials available to patients and clinics at our C4 Online Resource Center
