Subject: Announcement for transition of MARS Event users to GEMS WIN and End of Production Announcement for MARS Event and SEER Event.

Dear Valued Customer:

The purpose of this letter is to inform you that the MARS* Event Station and MARS Event Station Lite software is no longer available through GE Healthcare. Support will continue to be provided; however, if you are interested in continuing to use your event monitoring software on Windows** 7/Server 2008, an upgrade to GEMS™ (Global ECG Management Solution) WIN and GEMS Lite arrhythmia software is available from CardioComm Solutions, Inc..

GEMS WIN and GEMS Lite provide the same user interface and capabilities of the MARS Event and Event Lite solutions which will make the transition straight forward and will not require staff retraining. In addition, GEMS WIN users may take advantage of the integration of wireless event recorders into their monitoring services as well as retain use of their SEER* Event recorders. GE Healthcare has also secured preferred pricing for their MARS Event system users to make the upgrade to GEMS WIN or GEMS Lite.

If you are interested in moving to the GEMS Windows 7/Server 2008 compatible solution you may contact CardioComm Solutions for more information about upgrading to GEMS WIN Software as follows:

Phone: 416-977-9425 or 1-877-977-9425 ext, 294
Email: Sales@cardiocommsolutions.com
Website: www.cardiocommsolutions.com

Additionally, GE Healthcare will continue to offer the SEER Event recorders through March, 2015. As always, GE Healthcare will use commercially reasonable efforts to offer service parts and support for several years after the end of production. For more information about SEER Event, please contact your GE Sales Representative or your authorized GE Dealer.

Thank you for your continued business.

Sincerely,

Erin Carroll
