CardioComm Solutions Inc. Receives Enthusiastic Reception at The Annual American College of Cardiology Scientific Session

VICTORIA, B.C., March 16, 2004 – CardioComm Solutions Inc. (TSX-V:CCG) (the "Company", "CardioComm"), is pleased to announce that it participated at the American College of Cardiology Annual Scientific Session held in New Orleans during March 7-10, 2004.

This year, the Company collaborated and showcased its technologies at the annual event alongside such industry leaders as Philips Medical Systems, a division of Royal Philips Electronics (NYSE: PHG, AEX: PHI) and Instromedix (a division of Card Guard Technologies). CardioComm's products, focusing on cardiovascular-specific advances designed to increase operational efficiency at medical clinics/hospitals and improve overall patient care, were well received.

The Company was pleased that many significant industry leaders responded very favourably to CardioComm's Global ECG Management System (GEMS™) as the solution of choice for managing event monitoring and trans-telephonic pacemaker follow up in clinics and event monitoring services. Management held key discussions with several respected corporations focusing on how CardioComm's suite of products can successfully interface with their respective cardiovascular information management systems.

In addition, CardioComm is pleased to announce that it has completed a fresh re-design of its corporate web site. We welcome interested parties to visit us at www.cardiocomm.com.

About CardioComm Solutions Inc:

CardioComm's patented and proprietary technology is used in products for the recording, viewing, analyzing and storing of electrocardiograms (ECGs), for diagnosis and management of cardiac patients. CardioComm has achieved its technical goals of improved access and communication through the development of a real-time ECG viewer. CardioComm is the first company to provide a real-time means of viewing ECGs over a network (LAN, WAN or Internet). This tool enables ECGs to be viewed and controlled live, by physicians, over a global virtual healthcare network. This technology is marketed as Global ECG Management System (GEMS™) and GlobalCardio™. CardioComm's software products have been cleared for sale in the United States by the U.S. Food and Drug Administration. The Company has earned the latest ISO 13485 certification.
