CARDIOCOMM SOLUTIONS CONTRACTS DISTRIBUTION BROKER FOR LAUNCH OF THE HEARTCHECK™ PEN TO U.S. RETAILERS

Asset Management and Technical Logistics Services Secured for the Sale of the HeartCheck™ Product Line to Consumers and Commercial Buyers in the United States.

Toronto, Canada. – CardioComm Solutions, Inc. (TSX-V:EKG) (“CardioComm Solutions” or the “Company”) has selected New York based Integron, Inc. (“Integron”) as its distribution, supply logistics and warranty support provider. The agreement follows a series of meetings held between the two companies with execution of the completed agreement during the recent American Telemedicine Association meeting in San Jose, CA.

“We have had an excellent response to our pre-launch marketing efforts for the HeartCheck™ PEN and as we advance into full production mode, we needed to secure order fulfillment, inventory controls and retail relations administration capabilities. By engaging a company with specific expertise in deploying telehealth, tele-monitoring, remote patient monitoring, direct to patient fulfillment and wireless device inventory and services management, CardioComm Solutions will be able to remain focused on our core device production and global electrocardiogram (“ECG”) management software business activities,” reported Etienne Grima, CEO for CardioComm Solutions. “Integron was selected based on their 25 years as a logistics and deployment firm with significant expertise and infrastructure to manage, deploy and support specialized services to the healthcare marketplace. Integron offers us exactly what we need in our next steps for HeartCheck™ PEN sales throughout the US market”.

The three year renewable agreement will provide CardioComm Solutions with full product distribution capabilities to support bulk and single unit HeartCheck™ PEN sales to retail clients and to consumers. Costs for the services will be based on a per unit fee anticipating minimum shipment volumes of 100,000 units per year.

“With product availability scheduled for late summer to meet an “America first” launch, the addition of a logistics and order fulfillment company to CardioComm Solutions’ network of resources will ensure that we remain focused on device production, new device integration and HeartCheck™ SMART Monitoring services implementation,” said Dr. Anatoly Langer, Chairman of the Board of Directors for the Company.

“The completion of these negotiations comes at a very opportune time, as our first production run of 3,500 HeartCheck™ PEN units will be completed in June with a second 5,000 unit order soon after for pre-launch sales in the USA. With just over 200 product enquiries through the recent HospiMedica publication alone, we are planning to increase order sizes progressively,” said Simi Grosman, member of the CardioComm Solutions Board of Directors.
